TOOLS REQUIRED

N/A

STEP 1

Open the vehicle cargo area. Locate the soft top hinge bolt. The cargo cover will mount to this bolt on each side of the vehicle.

STEP 2

At the rear of the vehicle, clean the vehicle interior trim using the provided adhesion promoter pad. Repeat this procedure for the opposite side trim panel.

STEP 3

Adhere the front hook mounts to the vehicle by peeling the red tape backing, and firmly pressing each mount to the vehicle trim panel. Repeat this procedure for the opposite side trim panel.

Note: The mounts are specific to each side of the vehicle. Ensure the hook is facing upwards.

STEP 4

Retract each end of the cargo cover assembly by pulling inwards, and insert each end onto the soft top hinge bolts. Once secured, extend the cargo cover towards the previously mounted hooks.

Installation is now complete.
