

CENTER CONSOLE LOCK VAULT

(2021-2022+ BRONCO)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) Lock Vault Lid
- (1) LH Side Bracket
- (1) RH Side Bracket
- (4) Phillips Screws
- (4) Nuts
- (1) Thumb Tack
- (1) Phillips Screwdriver
- (1) Wrench

TOOLS REQUIRED

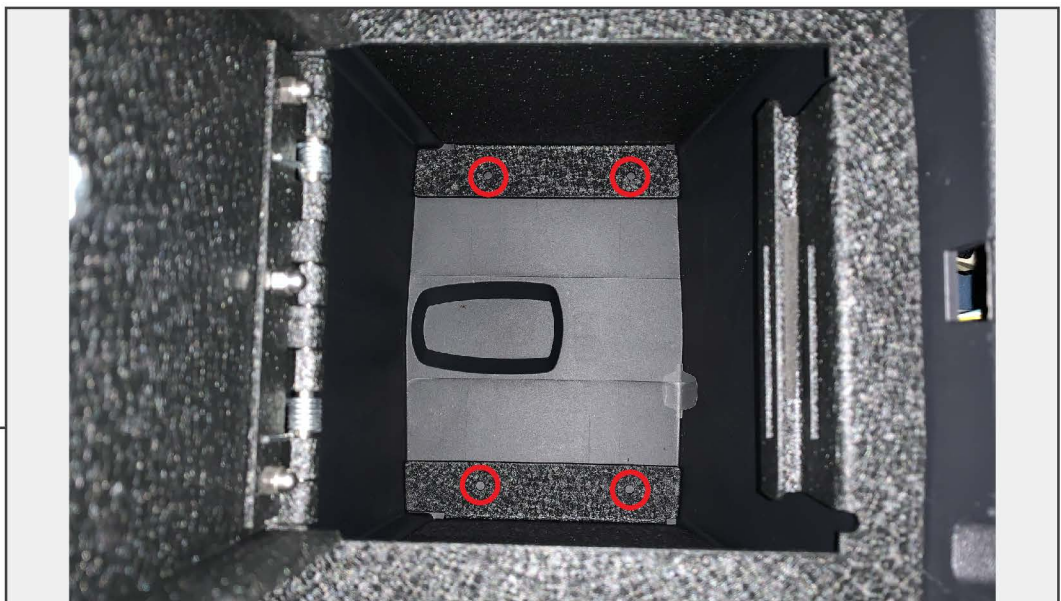

- Phillips Screwdriver (Provided)
- Wrench (Provided)

STEP 1

Remove all contents from the center console.

Place the LH and RH side brackets into the center console. Take note to the edges of the brackets as they fit around the contours of the center console. Do NOT secure the brackets to the center console at this time.

STEP 2

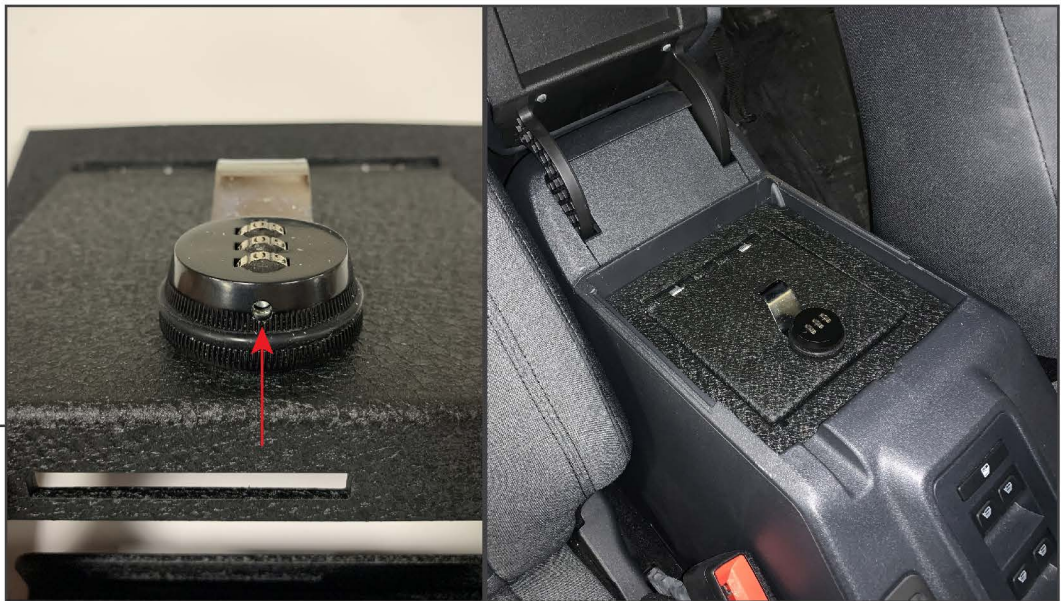

Place the lock vault lid onto the side brackets to confirm fitment. Once fitment is confirmed, remove the vault lid and secure each side bracket to the center console floor in the pre-drilled holes using (2) Phillips screws per bracket.

STEP 3

Place the vault lid onto the side brackets, and secure into place using (4) nuts onto the studs.

STEP 4

CHANGE PASSCODE: With the vault lid open, press the thumb tack into the hole on the side of the lock to depress the code button. While pressing the button, change the number dials to the desired combination. Once set, remove the thumb tack.

Installation is now complete.
