

# LED TAIL LIGHTS

(2021-2023+ BRONCO - WITH OEM HALOGEN TAIL LIGHTS)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

(1) LH Tail Light  
(1) RH Tail Light

### TOOLS REQUIRED

---

8mm, 10mm Sockets  
Ratchet with Extension  
Phillips Screwdriver  
Plastic Pry Tool  
Panel Removal Tool

**STEP 1**

Remove (4) Phillips head plastic push clips. Loosen the Phillips head inner portion of the clip, then pull the plastic clip body out of the vehicle.

Note: Add pressure under the plastic clip body to allow the inner portion of the clip to move outwards, if necessary.

**STEP 2**

Remove (2) 10mm screws from the tailgate trim panel. Remove the inner trim panel from the vehicle, and set aside.

**STEP 3**

In between the vehicle body and the rear bumper, remove (1) 10mm bolt.

**STEP 4**

Using a plastic pry tool, pull the vertical section of the tail light trim outwards.

**STEP 5**

Pull outwards on the horizontal portion of the tail light trim, then pull upwards to remove the trim from the vehicle.

**STEP 6**

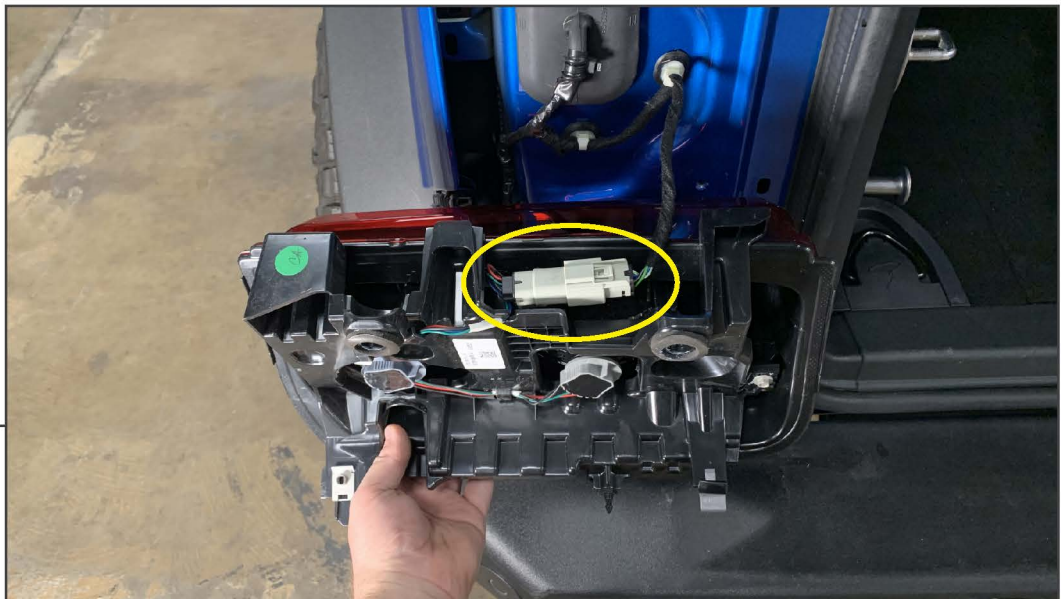

Remove (1) 10mm bolt from the outside of the tail light assembly.

**STEP 7**

Remove (2) 8mm bolts from the inside of the tail light assembly. Firmly pull the tail light assembly away from the vehicle body to dislodge the alignment pin.

**STEP 8**

Unplug the tail light connector from the tail light by pressing the plastic push tap, and remove the tail light from the vehicle.

Place the original tail light on a soft surface for disassembly.

**STEP 9**

Plug in the new LED tail light, and secure to the vehicle using the original hardware.

**STEP 10**

With the tail light secure, re-install the tail light trim and the inner trim in reverse order as removal reusing the original hardware.

Repeat steps 1-10 to install the remaining tail light. Installation is now complete.
