

BULL BAR WITH 100W SINGLE ROW LED LIGHT BAR

(2021-2024+ BRONCO - WITH OEM MODULAR FRONT BUMPER)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) Bull Bar w/ Light Bar
(1) Wiring Harness
(8) Flat Washers

TOOLS REQUIRED

T-40 Torx Socket
Ratchet

STEP 1

Remove the (4) T-40 Torx bolts in the vehicle front bumper.

The bolts will be reused.

STEP 2

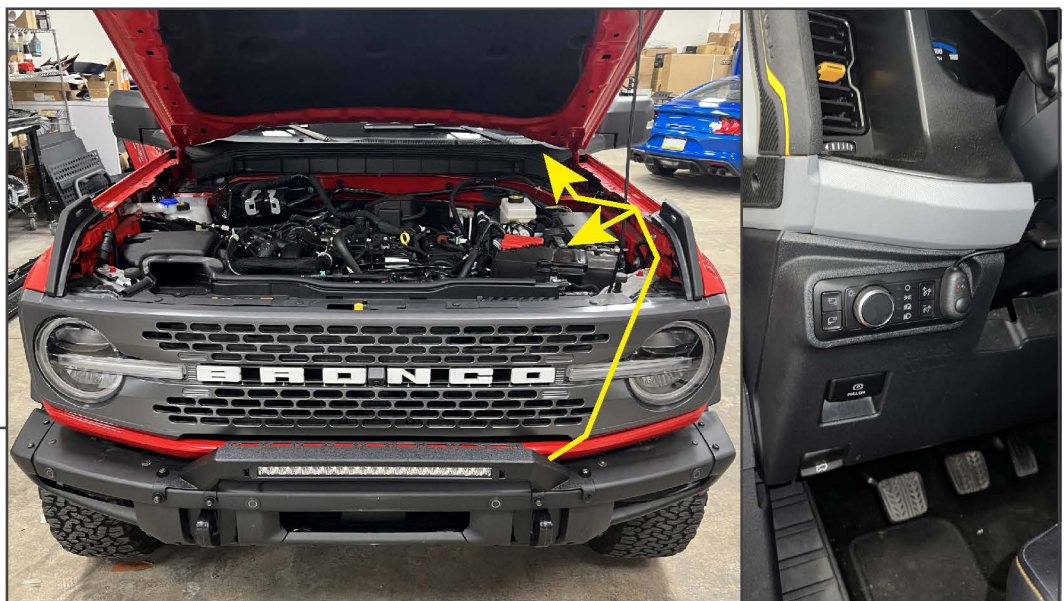

Install the included foam pads to be base of the bull bar using foam pad tape backing.

STEP 3

Fit the included (8) flat washers onto each of the vehicle T-40 Torx bolts. Then, fit the bull bar to the vehicle using the (8) T-40 Torx bolts and the (8) flat washers. Tighten the hardware evenly until the bull bar is secure.

STEP 4

Neatly route the included wiring harness to the light bar, battery, and interior.

- Route the light bar connector neatly behind the grille and bumper away from hot/moving parts.
- Route the on/off switch harness through a suitable firewall grommet. Adhere the switch to a suitable dashboard location using the attached tape backing.
- Connect the Red (+) & Black(-) leads to the vehicle battery terminals.

STEP 5

Installation is now complete.
