## STEP 1

Begin by evenly spacing the supplied hook and loop tabs onto the back side of the liner panels.

## STEP 2

Thoroughly clean the inside of the hard top panels to remove any dirt/grease. \*\*Recommended: Wipe the panels down with isopropyl alcohol to ensure the cleanest surface possible. Allow the hard top time to dry before install the headliner panels.

## STEP 3

Familiarize yourself with how the headliner panels fit prior to removing the mounting tab tape backing. Once comfortable with how they fit, peel back the tape backing. Install the panels to the headliner. Apply firm even pressure to mounting tab locations to ensure proper adhesion. Installation is now complete.
