

FUEL DOOR COVER

(2007-2018 WRANGLER JK)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) Fuel Door Cover
- (1) Allen Key
- (2) Allen Bolts

TOOLS REQUIRED

- Spray Detailer
- Microfiber Cloth
- Flathead Screwdriver
- Phillips Screwdriver

SKU # J150570

STEP 1

Remove the driver side tail light by removing the (2) inner Phillips screws. Unplug the electrical connection.

STEP 2

Remove the gas cap from the vehicle and disconnect the gas cap tether. Using a flathead screwdriver, dislodge the (2) accessible tabs securing the gas cap bezel to the vehicle. Once dislodged, remove the bezel from the vehicle.

STEP 3

Carefully remove the rubber gasket from the gas cap bezel.

STEP 4

Transfer the rubber gasket to the new gas cap cover. Install the gasket in the same orientation as originally installed. Align the fuel door cover to the vehicle, ensuring the gasket is securely around the filler neck.

STEP 5

Push the new fuel door cover to the vehicle, ensuring the outer bezel clips into place. Install the gas cap and gas cap tether inside the fuel door cover. Re-assemble the tail light reusing original hardware.

Installation is now complete.
