

LED SIDE MARKER LAMPS

(1997-2006 WRANGLER TJ)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LH Side Marker
(1) RH Side Marker

TOOLS REQUIRED

3/8" Socket
Ratchet
Panel Removal Tool

STEP 1

Un-twist the side marker light socket from the side marker lens.

STEP 2

Remove (1) 3/8" nut from the bottom of the side marker lens. Remove the side marker lens through the face of the fender flare.

STEP 3

Remove the light bulb from the vehicle light socket.

STEP 4

Plug the new side marker lamp into the vehicle light socket. Ensure the side marker lamp connector is fully seated. Test the light for functionality, if the light does not turn on, flip the LED connector 180*.

STEP 5

Twist the vehicle light socket into the new side marker lamp until secure. Place the new side marker lamp into the fender, and secure into place re-using the (1) 3/8" nut, tighten until secure.

STEP 6

Place the new side marker lamp into the fender, and secure into place re-using the (1) 3/8" nut, tighten until secure.

Installation is now complete.
