

WIND BREAKER

(1997-2006 WRANGLER TJ)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) Wind Breaker

TOOLS REQUIRED

N/A

STEP 1

Lay out the wind breaker. The black portion of the wind breaker will face the rear of the vehicle.

STEP 2

Using the (14) attached straps, secure the wind breaker around the vehicle roll bar behind the front seats. Attach all straps loosely, then tighten once all straps are in place.

Note: Do not wrap the straps around the sound bar or any other components. The straps are intended to only go around the roll bar.

STEP 3

Optional: If attaching the wind breaker to a tonneau cover, use the (3) button snaps to secure the wind breaker to the tonneau cover.

Installation is now complete.
