

LED FENDER LIGHTS WITH SEQUENTIAL TURN SIGNAL

(2018-2023+ WRANGLER JL)

(2020-2023+ GLADIATOR JT)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) LH Light Assembly
- (1) RH Light Assembly
- (6) Scotchlok Connectors
- (6) Cable Ties
- (2) Alcohol Prep Pads

TOOLS REQUIRED

- Plastic Pry Tool
- Pliers

STEP 1

Using a plastic pry tool, pry the vehicle trim panel away from the vehicle.

STEP 2

Clean the vehicle area using the included (1) alcohol prep pad, and allow the vehicle to fully dry.

STEP 3

Feed the attached wiring harness through the vehicle fender towards the front of the vehicle. The wiring can be accessed through the engine bay or around the fender liner.

Peel the red tape backing from the fender light assembly.

STEP 4

Fit and press the fender light into the vehicle fender.

Route the wiring towards the vehicle fender lighting.

STEP 5

Using the provided scotchlok connectors, connect the fender light wiring to the vehicle. See the diagram below as a reference. *Depending on vehicle trim level and model year, wire colors may differ from the diagram. Confirm connections using a test light before connecting each lead.

<u>LED Fender Lights</u>	-	<u>Vehicle Lighting Harness</u>
Red (Parking Lamps)	-	White/Brown [LH] ; White/Orange [RH]
Yellow (Turn Signals)	-	White/Green [LH] ; White/Beige [RH]
Black (Ground)	-	Black

STEP 6

Secure the wiring harness away from any moving/hot components using the included cable ties.

Repeat steps 1-6 for the remaining fender light assembly. Installation is now complete.
