

LED SIDE MARKER LAMPS

(2021-2024 GRAND CHEROKEE)

INSTALLATION INSTRUCTIONS

1. Turn the vehicle wheel to locate the plastic push clips securing the wheel well liner to the vehicle. Remove the various plastic push clips.
2. From behind the side marker, pinch the retaining tabs with needle nose pliers, and remove the side marker through the face of the bumper.
3. Slide the gray connector back, and unplug the electrical connector from the side marker housing.
4. Identify the LH and RH side of the provided side marker lamps. Once identified, plug the vehicle harness into the side marker, and engage the lock. Test the lighting.
5. With the light confirmed working, press the new side marker lamp into the bumper, and re-install the wheel well liner using the original clips.
6. Repeat Steps 1-5 for the opposite side marker light installation. Installation is now complete.
