

STARKEY PRODUCTS CONFIGURES YOUR NEW ADAPTERS TO WORK WITH THE MOST COMMON POLARITY USED ON AFTERMARKET LED LAMPS.

UNLIKE TRADITIONAL HALOGEN BULBS, LED LAMPS ARE POLARITY SENSITIVE MEANING THEY NEED THE POSITIVE VOLTAGE AND GROUND ORIENTED CORRECTLY TO FUNCTION.

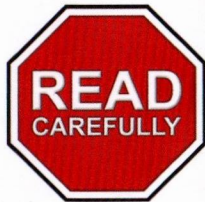

IN SOME CASES, THE POLARITY CAN VARY WITH AFTERMARKET LED LAMPS.

IF YOUR LAMPS DO NOT ILLUMINATE

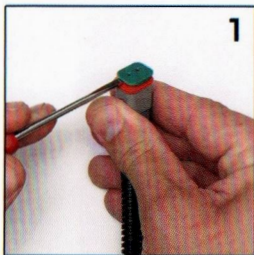

AFTER INSTALLING THESE ADAPTERS, IT IS SIMPLE
TO REVERSE THE POLARITY BY FOLLOWING THE
STEPS ON THE REVERSE SIDE
OR WATCHING THE VIDEO DEMONSTRATION.
