

Thank you for your business

- 1. All of our compression fit consoles are designed to remove from the box and slip over your console.**
- 2. We suggest using the velcro backing that is installed on the back of your console.**
- 3. Clean your vehicle's console with windex first or a light soapy water mixture.**
- 4. Then clean with 98% alcohol to remove any soap or waxy coating.**
- 5. Test fit to the vehicle's console to see where the velcro backing will sit to make sure you have cleaned enough off.**
- 6. Remove the backing from the underside of the metal console.**
- 7. Press firmly into place on the vehicle's console.**
- 8. Not all legs or rubber legs will touch the vehicle's console. The metal Molle PSD Console is made to take a load. Make sure to load the rubber feet to the touch console.**
