

Thank you for your business

Please read all instructions before starting

Dead pedal installation instructions.

1. Remove your old stock plastic pedal. You know the broken one.
  2. Remove the white pieces that are left behind.
  3. If you have to bend your studs in the floor to align to the holes in our pedal. Over time while using the stock plastic pedal it is moving the studs in the floor each time you place your foot on pressing it. This Bend the studs to the point of breaking your plastic pedal. So you may have to bend the studs to align our pedal. The pedal from us pattern was taken from a virgin truck never used.
  4. Install the Orange Boxx Fabrication pedal over the studs in the floor.
- Enjoy the new pedal.

This pedal carries a lifetime warranty. This states as you are using it as a foot pedal it will not break. If you do break it (LOL) send it back to us tell us

how you broke it for a free replacement.

**We supply decals with all orders. This was a tradition with me and my father. Every time he got something for his project, me and my brother got all the decals. Mooneyes was my favorite.**
