

LED THIRD BRAKE LIGHT

(2008-2023+ 4RUNNER)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LED Third Brake Light

TOOLS REQUIRED

Phillips Screwdriver

STEP 1

Locate the vehicle third brake light in the tailgate. Remove (2) Phillips head bolts from the bottom of the light assembly.

STEP 2

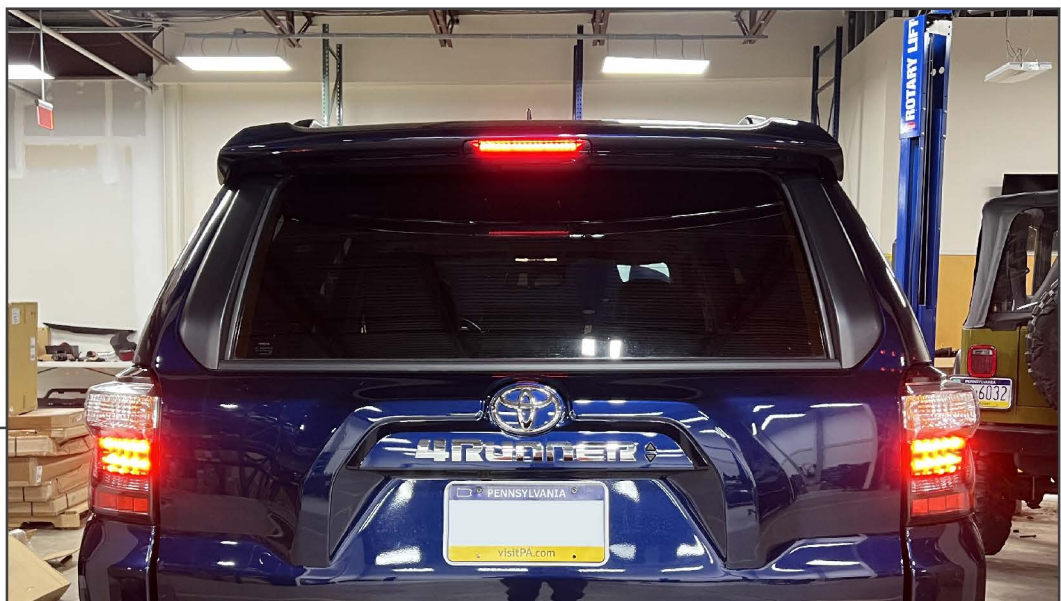

Press the plastic tab and unplug the vehicle harness from the third brake light assembly. Set the original brake light assembly aside.

STEP 3

Plug the vehicle wiring harness into the new third brake light assembly until the connector locks into place. Then, re-install the third brake light into the vehicle tailgate using the original (2) Phillips head bolts. Tighten the hardware until the brake light is fully secure.

STEP 4

Installation is now complete.
