

HPS Air Filter Cleaning Instructions

1. PRE-CLEAN

Tap the filter to remove excess dirt.

2. APPLY CLEANER

Spray the filter with the HPS air filter cleaner and allow the solution to soak in for about 15 minutes.

3. RINSE

Rinse the filter with water, clean side to dirty side, to flush out the dirt.
Do NOT use extreme high pressure.

4. DRY

Allow the filter to dry. Try to avoid placing the filter in direct sunlight or heat as it may shrink the cotton.

5. APPLY OIL

Re-oil the filter using the HPS air filter oil. Spray once every 2 square inch of filter and let it soak in. Go back and respray any unoiled areas. Wipe off any excess oil.
