Allen wrench);

d. 4mm socket wrench (4 mm

Allen wrench) ;

(3) Installation time: About 2 hours. 2 persons needed.

(Installation time is different according to individual person.)

(4) Installation Instruction:

Step 1:

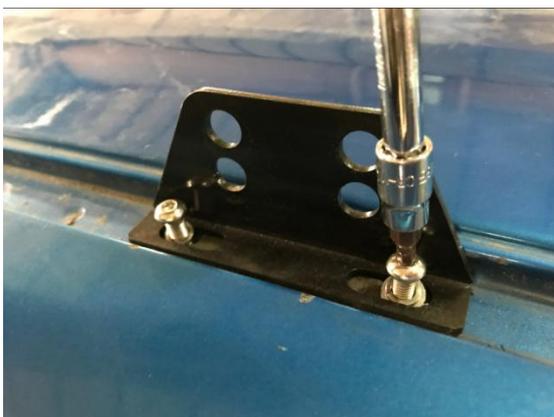

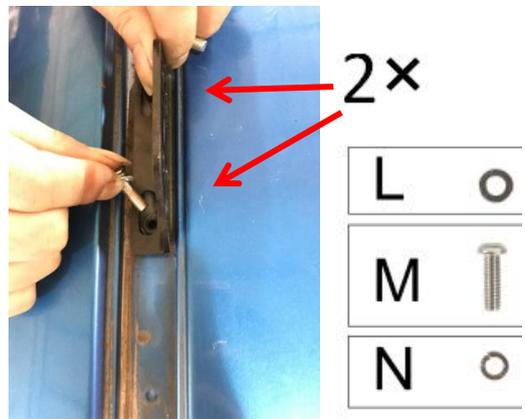

Begin by cleaning the Tacoma's roof and prepare all the roof rack components to start the installation.

Step 2:

Install the Part E into the Tacoma's roof.

Note: Don't tighten up the bolts this step.

Step 3:

Install the corresponding Part B into the two mounting brackets as the following pictures shown.

- 2x
- H 
- I 
- J 
- K 

Step 4:

Install the front cross bar(Part A) to the steel structure.

Step 5:

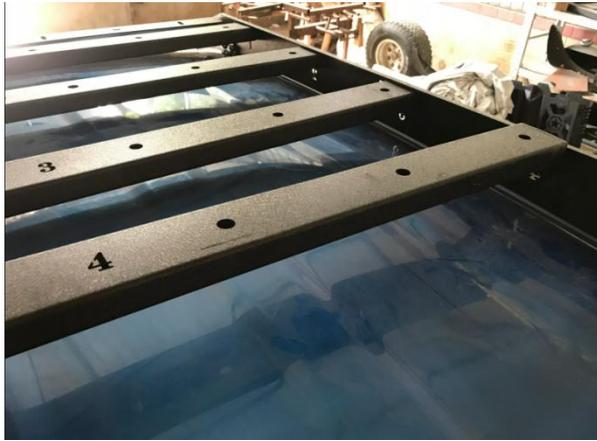

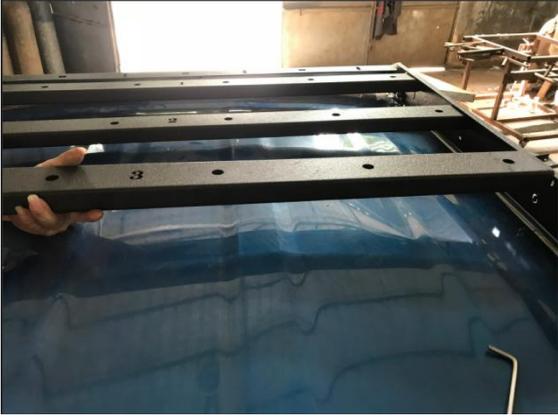

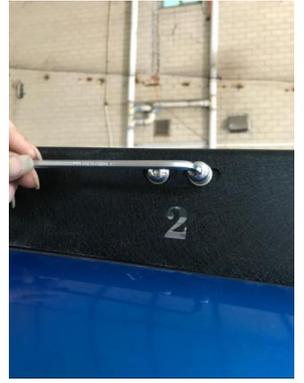

Install another Part B into the two mounting brackets and connect with the front cross bar.

Step 6:

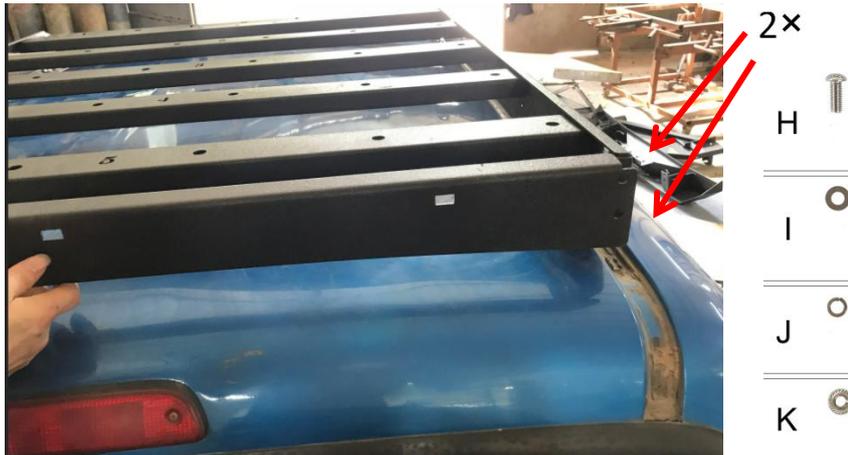

Install the cross bars(Part D) which are carved with number 1,2,3,4,5 in order.

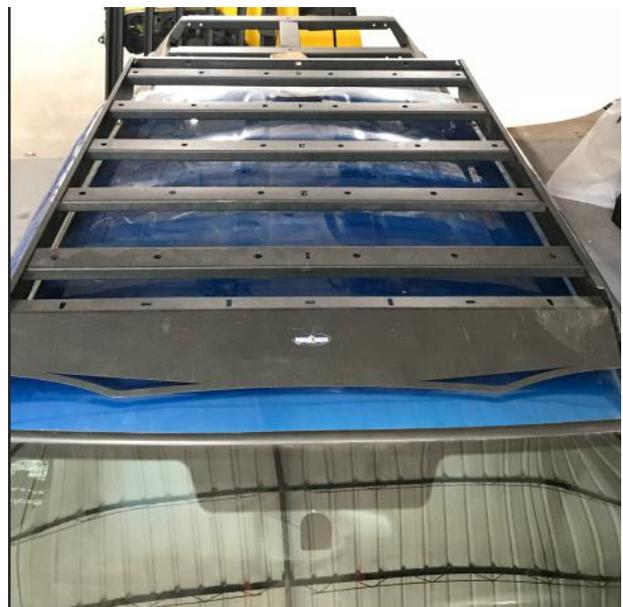

Step 7:

Install the rear cross bar(Part C) into the steel structure.

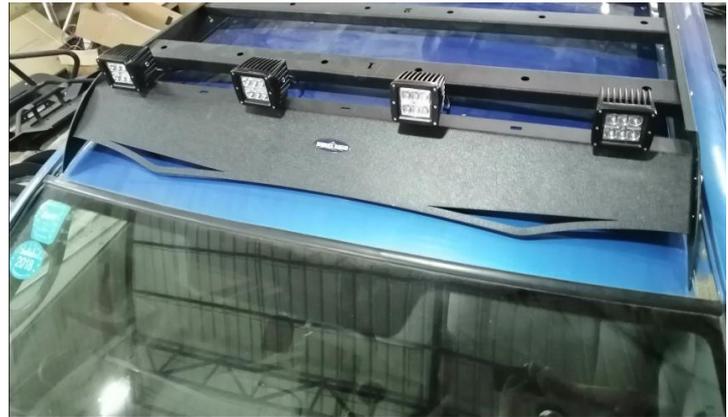

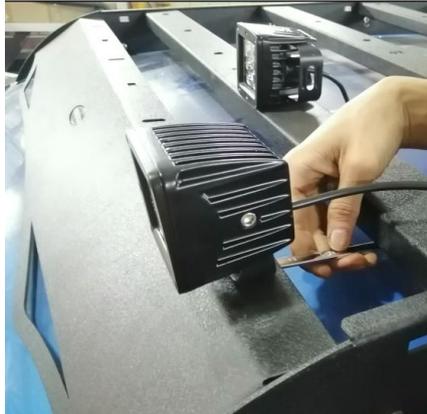

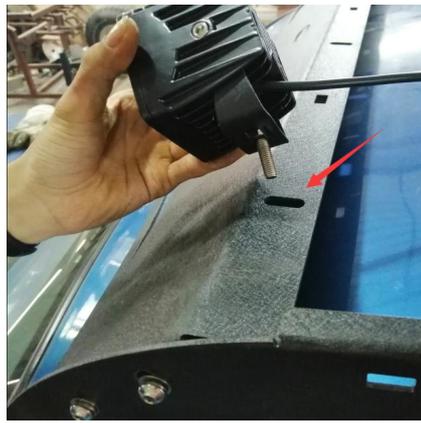

Step 8:

Check and tighten up all the bolts.

Step 9:

**Install the 4 LED spotlights
on the front cross bar.**

Once you have everything in place you are finished with the installation. Congratulations on the purchase and installation of a quality Hooke Road product!
